Give a commanding performance

Get M²ore from your counter service

Avery Berkel's M series retail scales feature **M² Technology** to help you conduct your business more effectively and profitably. Specific features designed to enhance your store's performance are combined with easier to manage scale networks, proactive downtime prevention and even lower ownership costs.

M200 – retail scale with customer tower display

As well as an integrated operator display, the **M200** features a column-mounted customer display for maximum customer visibility. It offers both receipt and label printing capability plus 40 pre-set keys that can be configured to your business needs for fast, efficient operation.

◆ Unrivalled print speed

With a market-leading print speed of up to 150 mm per second, the **M200** helps to reduce queues and enhance customer service.

◆ Quick-loading paper

The cassette printer accommodates paper rolls up to 120 mm in size and can be removed and reloaded in seconds.

Easy-access, quick-change label cassette

◆ Integral and tower displays

Two full dot matrix graphics displays make the **M200** simple for operators to use and easy to read. The tower display is the perfect medium to communicate customer messages and promotions.

◆ Powerful memory

The **M200** has ample data storage capability for even the largest retail operation – including memory for approximately 3,000 PLUs as standard with an option for expansion for up to 10,000 PLUs.

◆ Any traceability system

The **M200** is ready to operate with any legislative traceability system - for any type of product - anywhere in the world.

◆ E-mail alerts

Save time and money by preventing problems before they happen – the scale can be programmed to alert store or system managers to issues such as printer running out of paper, faulty print-heads and scale network problems.

◆ Voucher printing

Maximise sales opportunities by printing vouchers and promotional offers alongside your labels and receipts.

Promotional offers clearly displayed

◆ Asset management

Each scale can report on its location and status – saving the time and cost of a site inspection where maintenance or system upgrades are required.
